

## HDC 雙射射出成型機 HDC CO-Injection Molding Machine

### 專利轉盤設計

#### Patented Turntable Design.

專利轉盤在模具交換或開關模時，模具可精準定位，使模具與車壁貼緊度更為良好。專利設計防止模具下墜。  
Patented rotary platen, with accurate positioning for tilt-free.

專利轉盤轉動順暢，轉盤機械、電器、油壓三重之位確認，模員受到高度保護，正反轉定位百分百。  
Accurate positioning with triple control by mechanical, electrical, and hydraulic for perfect reciprocation.

### 轉盤採外齒式設計

#### 轉動與定位快速準確

External gear drive, rapid on rotation & accurate positioning.

### 伺服轉盤定位系統(選配裝置)

#### Servo-drive Rotation (Optional)

與傳統油壓轉盤相比，啟動時間短，運動過程平穩，達定位點後直驅煞車，無速度緩衝問題。  
每次轉動到位精準。  
Accelerated movement with accurate positioning & direct-break complete the rapid rotation.

### T型射出機(標準機選配改雙射)

#### T-type injection molding (Optional)

您目前已採購單色標準機，您可選配增加T型射座使單射變雙射。  
Alternative (optional) injection unit to convert a standard (mono-injection) machine into a T-type co-injection system.

### 三射射座系統(選配裝置)

#### 3rd injection unit (Optional)

可搭配第三射座進行三色射出。  
Join to complete a triplex molding.

雙射產品專用機種，您雙射機器的最佳選擇  
2-color/2-component molding application.

我們可依照您模具需求設計多射系統  
Customized injection available for mold designs.

高速精密、穩定度高

High Precise and Stable
